

NetAccess L-Series: L350 Payment Router

HIGHLY AVAILABLE MULTI FUNCTION PAYMENT ROUTER

NetAccess L-Series: L350 Payment Router

HIGHLY AVAILABLE MULTI FUNCTION PAYMENT ROUTER

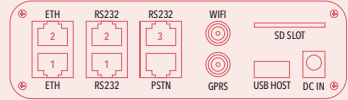

DIAGRAM: PORTS CONNECTION

CONNECTION TYPES

- Downlink EDC connections: RS232, RS485, TCP/IP
- Uplink host-side connections: RS485, TCP/IP, PSTN v.22 fast connect on-demand-dial, PSTN dial-and-hold PPP or
- Wireless uplink options: GPRS/ EDGE/ HSDPA/ 3G networks

DEVICES SUPPORTED

- Up to a combination of 30 payment devices

PORT CONNECTIONS

- 3 RS232 ports (option of 2 RS485 ports upgrade)
- 2 Ethernet ports
- 1 PSTN modem slot + 1 USB slave slot
- Option of either WIFI or 1 USB host
- 2 SIM slots

SUMMARY OF BENEFITS

- Multi-channel Auto-Fallback Engine for continuous availability of uplinks
- Cost savings with GPRS wireless connectivity replacing fixed lines
- Wi-Fi connectivity available
- Intelligent routing of data between interconnected local devices
- Built-in network redundancy with dual SIM slots
- Message filtering prevents non-ISO8583 messages from reaching the bank host
- Pipe encryption to bank hosts and selected ISO 8583 field encryption
- Reduces network and host resources
- Highly reliable with robust and energy efficient design
- Supports up to 30 payment devices
- Supports both EDC and ATM applications

Combination of
**30 PAYMENT
DEVICES**

Configurable Uplink
Options to Host

- **RS485**
- **TCP/IP**
- **PSTN**
- **xDSL**
- **GRPS**
- **On-demand Dial**

*RS485 connectivity is an optional function
